Summary

Mobile Development Lead with 7+ years building and scaling Android applications, from solo development to leading engineering teams. Currently driving architecture, sprint planning, and delivery for B2B safety-compliance platforms (Smart LOTO, EHSONe) serving multiple tenants in production. Strong in Kotlin, Jetpack Compose, and clean software architecture, with a track record of mentoring developers, improving delivery workflows, and building internal tools that cut team turnaround time significantly. Comfortable owning a product end-to-end: technical decisions, code quality, and cross-functional collaboration with stakeholders.

Professional Experience

Deltafour

Dec 2023 – Present

Mobile Development Lead — Remote

May 2026 – Present

- Promoted to lead the mobile engineering team in May 2026 based on technical ownership and delivery impact.
- Leading mobile architecture decisions, sprint planning, and technical execution across multiple client projects.
- Mentoring developers through code reviews, architectural guidance, and best engineering practices.
- Improved team delivery efficiency by streamlining development workflows and reducing turnaround time for feature releases.
- Created internal tools that reduced turnaround time by 80%, accelerating development and QA cycles.
- Lead development of Smart LOTO, a B2B safety and compliance platform supporting Lock Out / Tag Out (LOTO) and Permit To Work (PTW) across ~10 modules, serving 15 tenants and scaling, with ~110 DAU.
- Driving development of EHSONe, an advanced successor to Smart LOTO expanding into Incident Management (IM), Observation Management (OM), and Hazard Investigation & Risk Assessment (HIRA) alongside LOTO/PTW.

Software Development Engineer — Remote

Dec 2023 - April 2026

- Reduced project size by 30% through strategic refactoring and implementation of efficient algorithms.
- Improved app performance by 10% by identifying and removing critical bottlenecks.
- Developed scalable Android features for enterprise applications with focus on maintainability and performance.

One97 Communications Limited

May 2023 – Sep 2023

Software Engineer — Gautam Buddha Nagar, Uttar Pradesh, India

- Contributed to the development of a highly scalable application using Android architecture components, increasing user capacity by 25%.

- Collaborated within a cross-functional team to develop and maintain scalable software solutions, ensuring efficient and error-free code implementation, reducing bugs by 15%.
- Utilized agile methodologies in designing, testing, and debugging software applications, resulting in a 10% improvement in the deployment of new features to Android devices.
- Employed best practices to optimize application performance, closely aligning with requirements and enhancing Android app responsiveness by 20%.

Teckborn Technologies Pvt Ltd

May 2022 – May 2023

Android Developer — Gautam Buddha Nagar, Uttar Pradesh, India

- Collaborated with cross-functional teams to develop, design, and maintain scalable software solutions, increasing project throughput by 15%.
- Utilized agile methodologies to maintain efficient timelines and deliver Android applications on schedule, improving project delivery rate by 20%.
- Implemented Unit tests to ensure error-free and high-performance implementation of solutions, reducing critical bugs by 10%.
- Deployed Instrumentation tests to ensure compatibility between different Android devices and screen sizes, minimizing compatibility issues by 12%.
- Assisted team in writing clear code documentation and helped to rectify bottlenecks in app performance, improving readability and reducing error rates by 8%.
- Identified and optimized performance bottlenecks in the Android application, increasing app speed by 15%.

Magic Apps

Aug 2021 – Apr 2022

Software Developer — Gautam Buddha Nagar, Uttar Pradesh, India

- Collaborated with cross-functional teams to design, develop, and maintain projects, improving team efficiency by 10%.
- Wrote comprehensive code documentation for Android applications, enhancing maintainability and reducing onboarding time by 15%.
- Actively participated in code reviews to ensure code quality and adherence to coding standards, improving code quality by 10%.

Xatcovis Solutions Pvt Ltd

Feb 2019 – Jul 2019

Android Developer Intern — Gautam Buddha Nagar, Uttar Pradesh, India

- Collaborated with cross-functional teams to design, develop, and maintain Android projects, improving team communication by 10%.
- Employed best practices to optimize app performance and rectify bottlenecks, enhancing user experience by 10%.

ThePadosi

Sep 2018 – Nov 2018

Android Developer Intern — Gautam Buddha Nagar, Uttar Pradesh, India

- Collaborated with cross-platform teams to design, develop, and maintain scalable Android projects, improving project scalability by 15%.
- Authored code documentation to enhance maintainability, improving code readability by 10%.

Process Improvements

Deltafour

- Implemented a real-time crash notification system that automatically sends email alerts whenever the application crashes in production, reducing issue detection time and im-

proving response efficiency.

- Designed and implemented a dynamic update-check mechanism that determines if a specific client needs an app update, improving customer satisfaction by preventing unnecessary prompts.
- Implemented a secure base URL switching mechanism that allows the app to connect to test, dev, production, or ngrok servers, significantly reducing testing time and eliminating the need for extra builds.

Education

Dr. A.P.J. Abdul Kalam Technical University

Aug 2015 – Jul 2019

Bachelor of Technology - B.Tech — Gautam Buddha Nagar, Uttar Pradesh, India

Karl Huber Public School

Apr 2014 – Mar 2015

High School (CBSE) — Gautam Buddha Nagar, Uttar Pradesh, India

Skills

Technical Skills: Kotlin, Java, Android SDK, Flutter, Retrofit, Room, Realm, OAuth 2.0, Single Sign-On (SSO), Hilt, Jetpack Compose, Android Studio, Media Store, Clean Code, Software Architecture

Tools and Methodologies: Jira, Confluence, Jenkins, Github

Personal Skills: Communication, Team Work, Quick Learner, Time Management

Problem Solving: 500+ LeetCode problems solved (Easy–Hard) — leetcode.com/u/PawanRoy1997

Work Projects

Smart LOTO

Deltafour

B2B safety and compliance platform supporting Lock Out / Tag Out (LOTO) and Permit To Work (PTW). ~10 modules, serving 15 tenants and scaling, ~110 DAU.

Technologies: Android, Kotlin

EHSOne

Deltafour

Advanced successor to Smart LOTO, currently under development, expanding into Incident Management (IM), Observation Management (OM), and Hazard Investigation & Risk Assessment (HIRA) alongside LOTO/PTW.

Technologies: Android, Kotlin

payRup

Teckborn Technologies

Instant payment application for daily utilities like electricity bill, mobile bill, prepaid recharge, DTH recharge, broadband bill payment, etc. 500+ DAU; not currently available on the Play Store.

Technologies: Android, Kotlin, Payment Gateways

PDF Converter

Magic Apps

Offline Android application designed to simplify the process of converting PDF pages to images or creating new documents from existing pages.

Technologies: Android, Java, PDF Libraries

Whatsapp Status Downloader

Magic Apps

Automatically stores copies of Whatsapp statuses for 1 week. If user chooses to save a status, it's moved to gallery; otherwise deleted permanently.

Technologies: Android, Java, Background Services

Personal Projects

Deeplink Tester

A testing tool enables testing of deep-links by triggering it.

Technologies: Android, Deeplinks, Compose, MVVM, Room Database

HAR Reader and Analyzer

Application which facilitates reading of HAR files to checking the network bottlenecks and various API transactions between client and server.

Technologies: Android, Room Database, Compose, HAR Parsing
