

Pawan Roy

Mobile Development Lead — Senior Android Engineer

Uttar Pradesh, India — pawanroy0066@gmail.com — +91 89204 43782

LinkedIn: PawanRoy1997 — GitHub: PawanRoy1997 — LeetCode: PawanRoy1997

Summary

Mobile Development Lead with 5+ years of experience building Android applications using Kotlin, Jetpack Compose, and Clean Architecture. Currently leading architecture, sprint planning, and delivery for multi-tenant B2B safety platforms serving 15+ enterprise tenants. Experienced in mentoring engineers, improving engineering processes, and shipping scalable mobile solutions.

Professional Experience

Deltafour

Mobile Development Lead — Remote

Dec 2023 – Present

May 2026 – Present

- Promoted to lead the mobile engineering team based on technical ownership and delivery impact.
- Lead Android architecture for multiple enterprise applications using MVVM, Clean Architecture, and Kotlin, improving maintainability and release velocity.
- Mentor Android engineers through architecture reviews, code reviews, and pair programming, improving code quality and delivery consistency.
- Lead Smart LOTO, a B2B safety platform (LOTO & PTW) supporting 10+ modules, 15 tenants, and 110+ DAU.
- Lead development of EHSONe, expanding the platform with Incident Management, Observation Management, and HIRA.
- Developed an automated production crash alerting pipeline that reduced issue detection time from hours to minutes.
- Designed a per-client update mechanism, eliminating unnecessary update prompts.
- Developed an environment switcher (Dev/Test/Prod/Ngrok), eliminating separate QA builds.

Software Development Engineer — Remote

Dec 2023 – Apr 2026

- Reduced project size by 30% through strategic refactoring.
- Improved app performance by 10% by resolving critical bottlenecks.

One97 Communications Limited

Software Engineer — Uttar Pradesh, India

May 2023 – Sep 2023

- Built scalable Android features using Architecture Components, increasing user capacity by 25%.
- Reduced bugs by 15% through cross-functional collaboration and agile delivery.
- Improved deployment rate by 10% through disciplined testing and debugging.

Teckborn Technologies Pvt Ltd

Android Developer — Remote

May 2022 – May 2023

- Increased project throughput by 15% through scalable software design.
- Reduced critical bugs by 10% using unit tests and improved device compatibility via instrumentation tests.

- Optimized application performance, improving speed by 15%.

Magic Apps

Aug 2021 – Apr 2022

Software Developer — Uttar Pradesh, India

- Improved team efficiency by 10% through collaborative development.
- Reduced onboarding time by 15% by writing comprehensive documentation.
- Maintained code quality through regular code reviews.

Skills

Languages: Kotlin, Java, Dart

Android: Jetpack Compose, Android SDK, MVVM, Clean Architecture, Room, Retrofit, Hilt, Coroutines, Flow

Tools: Android Studio, Git, GitHub, Jenkins, Jira, Confluence

Others: OAuth2, SSO, Flutter, Realm

Work Projects

Smart LOTO

Deltafour

Production Android application supporting 15 enterprise tenants across 10+ safety modules.

Technologies: Android, Kotlin

EHSOne

Deltafour

Advanced successor to Smart LOTO, expanding into Incident Management (IM), Observation Management (OM), and HIRA. Currently in development.

Technologies: Android, Kotlin

payRup

Teckborn Technologies

Payment utility app for electricity, mobile recharge, DTH, and broadband bills. 500+ DAU.

Technologies: Android, Kotlin, Payment Gateways

PDF Converter

Magic Apps

Offline app to convert PDF pages to images or build new PDFs from existing pages.

Technologies: Android, Java

WhatsApp Status Downloader

Magic Apps

Auto-archives statuses for 1 week; user-saved statuses move to gallery, rest are deleted.

Technologies: Android, Java, Background Services
